

Our Business is to create a close working relationship with you so that you can focus on producing your ultimate recipes!

When you choose TCE Projects as your complete Process Systems and Process Installations, you have no need to worry, we are on hand when you need us and always will be.

What you get with TCE Projects:

- Experienced Process Systems and Process Installations Design
 - Installation
 - Full project management
- Turnkey Process Systems and Process Installation solutions
- Complementary advice on systems development

What sets us apart from the competition is we offer free project management and bespoke designs to fit your needs at no extra cost.

We have an established Anglo Chinese Agreement with a world class Process Systems Manufacturer and once delivered to our workshop in the UK, is then inspected before shipping to you.

TCE Projects also undertakes our own modifications to ensure our products meet your requirements.

We offer a 3 year warranty; the first year on site assistance within 24 hours of contact with us (as far as is practical)

The TCE Projects Six Step Philosophy

Our extensive process engineering experience means we understand where the pitfalls are in installing a system.

We've developed a clear 6-stage process to make sure that any problems are found and resolved before they become issues.

Whether you order a whole system or single piece of equipment – we use the same process to make sure your installation goes smoothly from start to finish.

Step 1- Pre-Order

Initial site visit+ system design & risk assessment

Building out the project plan, and setting out responsibilities & communications plan

Step 2-Manufacture

Bespoke production line manufacture

Weekly photographic progress updates,

Fully collaborative sign off process-to protect you.

Step 3-Sign Off

Distillery Design Consultant review and sign off

Development of Functional Design Specification (FDS)

Customer Sign off

Step 4-Shipping

Live tracking of shipment

All transit insurances covered by TCE

Customs & port clearance

Delivery to UK works for inspection & cleaning, to catch issues before onshipping to site

Available for inspection by client before delivery to client site

Step 5-Installation
